## What's New in the BandX?

BandX is a multi-track recorder for musicians who want to record layered recordings without being forced to work with the complexities of a program geared toward dance music or other sample based material. BandX supports stereo positioning, allowing for a wide variety of mixing styles. In addition to providing customizable preset mixing settings, BandX includes single-click track automation and precision control. Adjust the stereo positioning of individual instruments, voices or groups of instruments. It is easier than it sounds. Set up instrument, voice or instrument levels by hand or use automatic gain control. BandX allows for a wide variety of mixing styles, ranging from full-blown stereo recording to mid-fi solutions, all in one application. Track overviews allow the user to see each track without the need to open the entire application. This makes it easy to track multiple instruments or vocals. You can drag entire tracks to move them around the work space, or use the built in cut tool to quickly remove individual instruments or voices from the mix. The single-click track automation allows for precise control over individual instruments or voices. Each instrument, voice or track has its own Automation mode that can be set to send the input signal to a predetermined input or output. Automation also includes level trimming which allows instruments to be adjusted up or down without changing the signal level. Use the built in gain trim controls to fine tune the instrument levels. When playing back a mix, the user can choose to focus only on instrument level changes, leaving out the effects that the program uses to alter the recorded material. BandX offers a collection of carefully selected presets for vocals, instruments and mixing styles that will serve as a starting point for your creation. Adjust gain and stereo positioning with presets for vocals, instruments, and mixing styles. Export your mix in a common format such as WAV or MP3.
