Need for Speed is a series of racing video games developed by Criterion Games and published by Electronic Arts. The series was originally a GoldSrc project and was spun-off into a Criterion-owned franchise. The first game in the series, Need for Speed, was released in 2002. The game was followed by two sequels, Need for Speed: Underground and Need for Speed:

Carbon. Following the release of the third game, Criterion and EA parted ways. History A prototype named Le Mans was created in 1994 as a proof of concept for a Need for Speed-like game. Criterion staff rejected Le Mans, feeling it was not in the Need for Speed's "genre". Le Mans became the first game in the Need for Speed series. The first Need for Speed was published by EA. It was originally an independent project titled GoldSrc, which was created by Criterion founder Alex Ward, who became project director after Activision decided to acquire it. GoldSrc was originally announced on August 16, 2000, before EA acquired it, and became a project for EA Los Angeles. After EA acquired the project, it was moved to Criterion, a subsidiary of EA. Shortly after its release, Need for Speed was met with critical acclaim. GameSpot rated the game 9.5 out of 10 and called it "the game to beat" in 2002. The game's popularity helped EA's flagship game Burnout 2: Point of Impact to become a hit, leading to EA signing a multi-game deal with Criterion. The subsequent sequel, Need for Speed II, was developed by Criterion's own studio and released on October 19, 2003. The game was one of the most critically acclaimed racing games at the time of its release, with critics praising it for its

graphics and gameplay. Review aggregator Metacritic gave it a score of 90/100. The game's sales were less than the first one. The game was not as commercially successful as its predecessor, though it was more profitable for Criterion. The third installment, *Need for Speed: Hot Pursuit*, was released on October 28, 2006. It received critical acclaim, with critics praising its graphics and gameplay. Metacritic gave it a score of 88/100. *Need for Speed: Underground* was released for the PC on May 25, 2007. Reviews gave the game a score of 89/100. It was followed by the release of *Need for Speed: Carbon* on February 7, 2008, which
