Есть задача: На сервере нужно получать данные типа предметов. Их нужно получать по четверным страницам. Как правильно хранить данные? Например: На первой странице 10 предметов, на второй странице 50, на третьей 70, т.е. нужно складывать в очередь на сервере, чтобы данные записались подряд. А на четвертой странице приходит сразу 100 предметов, так что тратится это нечем. Из более 100 000 предметов даж
